

Creation Care Earth Day Challenge 2026!

Honor our Planet on Earth Day and Every Day!

“And God looked upon all that God had made, and indeed, it was very good.” Genesis 1:31

The Wisconsin Conference Creation Care Team is urging every congregation to take a step to honor and care for creation this spring!

Earth Day is Wednesday, April 22, but we don't need to limit our activities to just that day. Down here on the planet, every day is Earth Day!

We have a long list of ideas for personal, church, local, and even global activities to consider. Some are as easy as a one-time special offering, others involve community-level participation. Here's a link to our suggested list, but feel free to come up with your own ideas: <https://tinyurl.com/42eb7k7u>

Here's what we'd like you to do!

- Choose an activity as a congregation or Green Team to do anytime this spring.
- Carry out your planned activity.
- Send us a short article about what you did! Photos and videos would be wonderful. We will share the reports we receive in future Kairos Newsletters.

There are some especially great options through Heifer International's "Caring for the Earth" gifts. We can collectively give one of their larger gifts (like a Community Solar Kit) by sending our donations to the Wisconsin Foundation UCC (<https://onrealm.org/wcucc/give/creationcare>). Wouldn't it be great for Wisconsin UCC churches to join together to power a village this year!

We look forward to hearing what your church did for the Earth this spring! Reports should be sent to our Kairos editor Susan Webb at sfwebb52@gmail.com. Thanks in advance for joining other churches across the state to honor creation.
