

## Lunch & Learn

# Inspection and Inspection Response Forms

This is one of the most problematic areas in our contract where most of the mistakes are made...mistakes that ultimately harm both agents, both Firms, both Clients and our industry as a whole. Join us as Ken details out how these forms work and the options both parties have during this contingency. He will also cover the most common mistakes being made.

Ken's guarantee to you is he will not leave the room until every person completely understands these forms and how Computation of Time is applied.

- *Do you completely understand the Inspection Contingency, computation of time and how all the moving parts work?*
- *Bring any questions you might have about Inspection Contingency. Ken is here to help you understand the inspection process.*
