What is a Charrette?

A charrette is an inclusive, interactive and collaborative workshop whose purpose is to identify relevant issues and potential solutions for projects with community-wide significance.

Why have Charrettes for the Corridor and Trail?

Outreach for the NSC and CST has resulted in your communities identifying their unique “Special Places”.

These placemaking charrettes are the next step in exploring relationships between those Special Places and the Corridor and Trail. The charrette process assists and empowers you to develop concepts for spaces, features, access, alignments and activities that can preserve, enhance, and create public spaces that promote people’s health, happiness and well-being in and around the Corridor and Trail.
