'THE WEEKLY DOCTORDOUG REPORT'

FLU SEASON REMAINS HIGH NATIONALLY BUT IT IS MODERATE IN ARIZONA AND IN DECLINE.

IT WILL BE A HEAVY PRESENCE FOR 3-4 MORE WEEKS AND THEN WILL BE VERY LITTLE IN THE VALLEY. IF YOU HAVE HIGH FEVER, SEVERE ACHES AND PAINS, AND COUGH... IT IS MOST LIKELY FLU... BUT TEST FOR COVID. WE HAVE FLU MEDICATION SO BE IN TOUCH.

COVID IS LESS THEN $\frac{1}{2}$ OF WHAT IT WAS LAST YEAR. THIS IS GOOD NEWS. BUT IT IS STILL AROUND.

RSV REMAINS... LOW... AND REMAINS STEADY.....LESS THEN $\frac{1}{2}$ OF LAST YEARS NUMBERS.

***CURRENT COVID VACCINE IS IN PHARMACIES. IT IS STILL A SOLID MATCH FOR THE CURRENT COVID VIRUS**

RECOMMENDATIONS FOR 2025 IMMUNIZATIONS:

DATA CONTINUES TO SUPPORT BENEFIT FROM COVID VACCINATION. BENEFITS OF THE SHOT INCREASE WITH AGE AND WITH CONDITIONS THAT

**PREDISPOSE TO COMPLICATIONS
(EMPHYSEMA/COPD, HEART FAILURE, DIABETES,
IMMUNE SUPPRESSION)**

CURRENT COVID STATUS:

**THE CURRENT COVID STRAINS ARE VERY CONTAGIOUS
AND PRESENT THROUGHOUT ARIZONA... WE ARE SEEING
SEVERAL EACH WEEK, MOST DUE TO TRAVEL OR LARGE
EVENT ATTENDANCE.**

**IF YOU GET SICK AFTER TRAVEL OR ATTENDING A BIG
GATHERING... DO A COVID TEST. ALL STANDARD COVID
TESTS WORK TO IDENTIFY THE CURRENT STRAINS.**

**ALL DOING WELL. BE PROACTIVE TO PREVENT NEED
FOR HOSPITALIZATION. PROTECTION IS UP TO YOU AND
NOW IS A PERSONAL DECISION. DO WHAT MAKES YOU
COMFORTABLE.**

**DATA 100% SHOWS THAT GOOD MASKS MAKE A
DIFFERENCE. THEY ARE NOT PERFECT, BUT THEY DO
REDUCE RISK OF EXPOSURE AND INFECTION.**

- I CANNOT STRESS THIS ENOUGH... IF YOU DON'T
WANT COVID & FLU FROM TRAVEL... WEAR A MASK IN
THE AIRPORT CROWDS AND ON THE AIRPLANE
(UNTIL 10,000 FEET) ... THIS IS NOT AS ESSENTIAL AS
IT WAS WHEN COVID WAS MORE SEVERE... BUT IF
YOU WANT TO AVOID INFECTIONS IN GENERAL
DURING TRAVEL... IT'S A RECOMMENDATION.**

- **EVEN SELECTIVE MASK USE WORKS WELL... SUCH AS ONLY IN CROWDED SPACES IN THE AIRPORT, AND DURING TRAVEL 'TO' YOUR DESTINATION, SO THAT YOU ARE NOT ILL DURING YOU VACATION/TRAVEL TIME. LESS IMPORTANT WHEN YOU RETURN FROM VACATION.**
- **GET BOOSTED IF YOU HAVE NOT DONE SO...PARTICULARLY OVER AGE 65 WITH HEALTH ISSUES OR OVER 75 WITHOUT HEALTH ISSUES. EVERY 6 MONTHS IS THE RECOMMENDATION FOR THIS GROUP.**

I RECOMMEND THE COVID BOOSTER GENERALLY FOR THOSE OVER 65. BUT.....

- **I HIGHLY RECOMMEND A BOOSTER FOR THOSE 80 & OLDER.**
- **I HIGHLY RECOMMEND THE BOOSTER FOR THOSE OVER 65 WITH HEART FAILURE, SIGNIFICANT LUNG CONDITIONS, AND DIABETES.**

CONSIDER BOOSTING WITH THE NEW COVID VACCINE TO REDUCE RISK OF COVID AND TO REDUCE COVID SYMPTOM SEVERITY.

VACCINATIONS:

- **COVID SHOT...GET UPDATED VERSION**

- **FLU SHOT ...SEASON IS COMING TO AN END. IF TRAVELLING EXTENSIVELY YOU CAN CONSIDER THE FLU SHOT. IF NOT... IT'S PROBABLY TOO LATE IN THE FLU SEASON TO JUSTIFY A SHOT NOW.**
- **RSV SHOT (CAN CONSIDER TAKING IF YOU HAVE NOT TAKEN YET)**

DO NOT GET ALL SHOTS AT THE SAME TIME. RSV SHOULD BE TAKEN ALONE.

**RSV VACCINE:
THIS IS A NEWISH VACCINE. HAS BEEN GENERALLY
AVAILABLE FOR 2+ YEAR.**

WHO SHOULD GET IT:

THE MOST IMPORTANT GROUP IS NOW CLEAR....THOSE WHO LIVE IN GROUP SETTINGS, INDEPENDENT LIVING WITH PEOPLE CONGREGATE FOR MEALS AND THOSE IN ASSISTED LIVING SITUATIONS.

ALSO.... PEOPLE AT HIGHER RISK SHOULD CONSIDER GETTING THE RSV VACCINE THIS YEAR IF THEY ARE INCLINED...BUT DON'T FEEL OBLIGATED.

FOR THOSE OVER 65 WHO HAVE ADDITIONAL RISK FOR SERIOUS ILLNESS AS A RESULT OF HEALTH ISSUES SUCH AS: ACTIVELY TREATED HEART FAILURE, CANCER, LUNG DISEASE, OR DIABETES.

THERE ARE TWO VERSIONS, BOTH SIMILAR, AND THERE IS NO SPECIFIC REASON TO CHOOSE ONE OVER THE OTHER

**(ONE IS GSK..MAKERS OF SHINGRIX, THE OTHER IF
PFIZER...MAKERS OF THE COVID VACCINE)**

WHEN TO GET RSV VACCINE:

CAN GET AT ANY TIME. ANY SEASON IS FINE.

**IF YOU GET SICK YOU NEED TO TEST FOR COVID.
CONSIDER COMING INTO THE OFFICE PARKING LOT FOR
FLU TESTING AS WELL**

**TREATMENT FOR COVID AND FOR FLU IS AVAILABLE AND
WORTHWHILE IN MANY INSTANCES.**

**TREATMENT FOR RSV IS PURELY SYMPTOMATIC.... WE
TREAT THE SYMPTOMS AS THERE IS NO ANTIVIRAL FOR
RSV**

**PAXLOVID ANTI-VIRAL PILLS ARE WIDELY AVAILABLE....
BUT MOST PEOPLE DO NOT REQUIRE MEDICATION TO
TREAT THEIR CASE OF COVID.**

**PLEASE LIVE LIFE, BEING CAREFUL IN WAYS THAT MAKE
YOU FEEL MOST COMFORTABLE, BUT DO NOT RESTRICT
YOUR ACTIVITIES.**

**FOR THE UNVACCINATED.... KEEP YOUR EYES ON THE
ROAD.... COVID CONTINUES TO BE AN ISSUE.
THE CURRENT VARIANT IS MUCH Milder, BUT THERE ARE
CONCERNS FOR THOSE WHO ARE NOT VACCINATED. WE
ARE TREATING NEARLY ALL THE UNVACCINATED THAT
GET COVID.**

**RECOMMENDATIONS FOR MASKING WHEN TRAVELING IS
A PERSONAL DECISION.**

**DO NOT CONCERN YOURSELF IF OTHERS ARE
MASKING. IF YOU WEAR A HIGH-QUALITY MASK YOU ARE
INCREASING YOUR PROTECTION AND DECREASING YOUR
RISK.**

- I DO RECOMMEND WEARING A KN95 OR N95 IN THE
AIRPORT TERMINAL WHERE EXPOSURE IS
GREATEST.**
- ON THE AIRPLANE, WHEN THE ENGINES ARE FULLY
ON, THE AIR IS BEING HIGHLY FILTERED AND
EXPOSURE IS MUCH LESS. WEARING AN EXCELLENT
MASK WILL REDUCE YOUR RISK DURING FLIGHT, BUT
IT IS UP TO YOU IF YOU WISH TO USE THE MASK AT
THAT TIME.**

**Yours in good health,
Dr. Lakin**
