

HB 2: Release 1 Dated 09/22/2025

Starting Over....

1) the 23-24 year is now history, and typically, when I get rid of an old year, I add a new one at the end....so now you see 29-30!! at the end.

2) most of 24-25 data has been loaded and reflects TEA's Near Final run as of 9/19 (more NFs to come from TEA I think)....the yellow-shaded cells under Column C of the data entry tab need data (especially the 3 eligible debt 'as of' dates), if applicable.

3) **ALERT** - TEA has now incorporated into their 25-26 Tier I Detail Report the details of the Early Education Allotment, so I have done that as well - the bad news is in the process of matching what TEA has, I discovered I was multiplying by a wrong # in one of the formulas, so that's been fixed....so your allotment is less than in previous releases, unfortunately.

HB 2: Release 2 Dated 09/29/2025

Oooooops - wasn't paying too much attention to EDA - the #DIV/0! error messages on the Report-SOF2526-HB2 tab have been fixed.....nothing else has popped up (fingers crossed).
