PROGRAM DESCRIPTION

The QuickBooks program will provide entrepreneurs a chance to master QuickBooks accounting software, allowing for better management of their business finances to help these companies grow. Upon completion of the process, you should be proficient in financial reporting and better equipped to run your business.

The program will consist of an introductory meeting with 5 weeks of training to include implementation and customization of QuickBooks online. The classes are 1.5-2 hours in length, every other week and offered in a hybrid method depending on the teacher. Our Program Coordinator is a certified QuickBooks professional and will help guide you through this process.

This is a two-year commitment with the first year fully paid for by the E-Center. Business owner must provide \$600 at the start of the second year of training for the QuickBooks annual subscription. If your business already has QuickBooks, you pay nothing.

The Entrepreneurship Center recognizes a need for small businesses to develop their capacity for financial reporting, as this is often a barrier between their growth and financial stability. We believe in providing resources at high level quality to help support our entrepreneurs in Middlesex and Essex Counties.

The QuickBooks program offers small businesses educational training and usage of an accounting software to enhance their ability to manage and grow their companies, providing increased abilities for economic success. Through a group setting of classes and one-on-one thereafter, our Program Coordinator and Business Coaches will provide ongoing support to small business owners to ensure they are on the right track.
