

Venetian Causeway Utility Relocation Project

NOTICE OF CONSTRUCTION

SEPTEMBER 2026

PROJECT OVERVIEW

The Venetian Causeway Utility Relocation Project will install approximately one mile of casing to relocate the existing overhead communication utilities. The casing will be installed by horizontal directional drilling (HDD) and a portion of the installation will be submerged in Biscayne Bay/the Intracoastal Waterway near Venetian Way. The project will utilize advanced construction methods to minimize and avoid direct impacts to the Biscayne Bay aquatic ecosystem. The utilities along the causeway are being relocated in advance of the Venetian Causeway Bridge Replacement Project. *(See Project Area Map on back.)*

WHAT TO EXPECT DURING CONSTRUCTION

Construction operations and temporary lane reductions **Monday through Friday from 10 a.m. to 4 p.m.**

Construction workers, equipment, and materials at the Venetian Causeway bridges.

Intermittent/temporary lane closures and flagging operations on Venetian Way. **Commuters can expect delays.**

Sidewalks and bicycle lanes will be closed at the bridge(s) during construction operations. Pedestrians and bicyclists will be assisted through the work zone by construction workers/flaggers.

Motorists should be mindful of construction vehicles, workers, and activities when traveling along Venetian Way.

PROJECT SCHEDULE

Project Start

Mid-September
2026

Communication Utility Relocation

Mid-September to
Early March
2026

Teco Gas Utility Relocation

Early January to
Late January
2026

WASD Utility Relocation

Late January to
Early April
2026

Project Completion

Early April
2026
