

Thanks so much for connecting with us! We are all doing well in our family as well as the other AGWM workers here in Nepal. Today was our first day on total countrywide lock down. It is being strictly enforced, as in other countries. It looks like a ghost town around here. So far there was one reported case a few weeks ago and now another one this week. There is not much available here for testing and treatment. So its best for us to lay low and do all the preventative measures as possible.
