

Hello Gayland,

[I just gave you a call at 9:02 Turkish time, 1:02 cst from our internet phone.](#)

I was ill, then my wife Laura got ill, but we are both doing well now. Our son Elijah is doing well.

The second of April I finished my last video meeting at 4:30 pm and was feeling tired so I went to lay down to rest. I awoke at 6:30pm feeling very disoriented and feverish. My wife took my temperature and i was at 103.5°F.

I immediately started taking high dose vitamin c and zinc. My body and head were aching very bad, and up until 2 days ago I was very lethargic. Today I feel normal and refreshed. Laura is still tired, but the fever and body/headaches have passed for her also.

We have had a very wonderful time as a family to focus on praising the Lord!

We're really glad to hear from you! We've been praying over the state and district ferociously during this season!

Good bless the work He has given to your hands,

Brandon, Laura, & Elijah
