

Dearest Friends, Mission Partners,

We are living in a time of unprecedented turmoil in our world. It is so good to know our God and trust in Him. Many are fearful and in danger at this hour, not only from the Covid virus still taking lives but also the terrible unrest and violence now on the streets of our cities in America. May we seek God, who alone can bring hope and healing. People need Jesus.

I would like to ask prayer for an urgent personal need. As you know, I am living on the Island of Negros, in the central Philippines. Our country has been shut down with no travel between Islands for almost three months. I have an eye disease that must be treated by injection every 4-6 weeks. Due to the travel ban, it has now been almost three months since my last injection and there is still no way to get to Manila to get it done. Travel was to open by June 1, but now the airlines have cancelled all flights again. We do not know when we will be able to travel to Manila. Please pray for God's healing of my eye. It has gotten worse, to the point that I cannot see clearly from my right eye. There is nothing I can do about it, need God's divine intervention. I am trusting God to save my eye, for healing and for a way to get to Manila or possibly the US to be able to get it treated. I am trusting Jesus who led me here and knows and cares. Thank you for your prayers.

Our churches here are beginning to meet again, though in small groups and a lot of restrictions. The cases of Covid continue to be on the rise in Manila, though our Province has had few new cases.

We will see what God will do. He is in control and is working in these times that a world of lost people will know His love and saving grace.

Sincerely, with love and thanks,
