Where the Storm Drain Ends:

Worcester's Grey Infrastructure and Surface Water Quality

Stormwater is one of the leading causes of water quality challenges in our lakes and ponds. Why do we need storm drains? How can they harm our waters, and what can the City and I do about it?

November 6th, 6:30-8:00 pm
Worcester IBEW Local 96, 242 Mill Street

Join the Worcester Department of Public Works and Parks for a free workshop about our stormwater infrastructure and lake water quality. We will demystify how drains are connected to outfalls, CSOs, and what we can do to prevent rain from becoming pollution.

Light refreshments
and catchment maps provided.
