IDAHO BARLEY HISTORICAL PRODUCTION - LAST 10 YEARS

	Acres Planted	Acres Harvested	Yield (bu/ac)	Total Bushels	State Rank	% of Nation's Crop
2026	445,000	380,000	100	38,000,000	1	32.90%
2025	520,000	490,000	112	54,880,000	1	39.00%
2024	530,000	510,000	109	55,590,000	1	38.70%
2023	570,000	540,000	112	60,480,000	1	32.70%
2022	560,000	540,000	111	59,594,000	1	34.40%
2021	520,000	490,000	89	43,610,000	1	37.0%
2020	530,000	500,000	110	55,000,000	1	33.3%
2019	550,000	530,000	104	55,120,000	1	31.9%
2018	550,000	530,000	101	53,530,000	1	34.9%
2017	530,000	510,000	95	48,450,000	1	34.1%
5-Year Average 2022-2026	525,000	492,000	108.8	53,708,800	1.0	35.5%
10-Year Average 2017-2026	530,500	502,000	104.3	52,425,400	1.0	34.9%

Data from USDA NASS Crop Production Reports

2021 - Lowest Yield in past 10 years at 89 bushels per acre

2023 and 2025 - All-Time Record Highest Yield at 112 bushels per acre (dryland and irrigated combined)

2026 - Lowest Total Bushels Produced in past 10 years at 38,000,000

2023 - Highest Total Bushels Produced in past 10 years at 60,480,000

2026 – Ranked 1st in total U.S. Barley Production at 32.9% of U.S. Crop – #1 in all of the past 11 years
