Disaster Recovery DWGs provide funding to create temporary employment opportunities to assist with clean-up and recovery efforts when an area impacted by an emergency or major disaster is declared eligible for public assistance by the Federal Emergency Management Agency (FEMA),

Qualifying events include major economic dislocations, such as plant closures, mass layoffs, or higher-than-average demand for employment and training activities for dislocated members of the Armed Forces and their spouses. The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

CDC's Injury Center announces the availability of fiscal year 2020 funds to implement CDC-RFA-CE20-2001, Comprehensive Suicide Prevention. This Notice of Funding Opportunity (NOFO) supports implementation and evaluation of a comprehensive public health approach to suicide prevention. Such an approach includes strong leadership as the convener of multi-sectoral partnerships; prioritizes data to identify vulnerable populations and to better characterize risk (e.g., relationship, job/financial, mental health problems) and protective factors (e.g. connectedness, hope, resilience) impacting suicide; leverages current prevention practices and fills gaps by selecting multiple and complementary strategies with the best available evidence using CDC's Preventing Suicide: A Technical Package of Policy, Programs, and Practices; rigorously evaluates the overall approach and individual activities; feeds data back into the system for quality improvement and sustainability; and effectively communicates results. The purpose of this NOFO is to implement and evaluate this approach to suicide prevention, with attention to vulnerable populations (e.g., veterans, tribal populations, rural communities, LGBTQ, homeless, other) that account for a significant proportion of the suicide burden and have suicide rates greater than the general population in a jurisdiction(s) (e.g., state, city/county, tribe). Key outcomes include a 10% reduction in suicide morbidity and mortality in the jurisdiction(s).

The Foundation's goal is to assist individuals in becoming successful, self-sustaining, contributing citizens. The Foundation is interested in programs that break down any barrier that prevents a person from continuing to grow and learn through grant programs including:

- 1) *Education*: Education is the primary focus of the Foundation. The Foundation supports education programs in K-12, at both public and private schools, that seek to solve the existing problems in Los Angeles area schools. These grants for education reform can be made directly to the schools or to independent organizations which are closely involved with this issue. In addition, the Foundation provides funds to private secondary schools, colleges and universities for student financial assistance, in the form of both scholarships and loan programs. Favor is given to those programs directed at talented middle income students who are unable to obtain assistance from sources specifically available to low income students.
- 2) *Community, Health, & Social Services*: The Foundation is also committed to improving the quality of life in the local community. The Foundation supports programs that encourage all individuals to reach their fullest potential. The best chance a young person has to reach that goal is to stay in school, inside a functioning family, and outside the juvenile justice system. To that end, the Foundation supports programs that deal with issues such as the high drop-out rate, lack of sufficient health care, substance abuse and violence. In addition, the Foundation will consider programs that address poverty issues and assist the economically disadvantaged. Programs aimed at solutions to or the prevention of these problems are favored. Although the Foundation recognizes the importance of Community, Health, and Social Services, it is not the Foundation's primary funding focus.

Match: No

By advancing methodologies and policies that address the underlying causes of wrongful convictions, URLPWC funding is intended to help prosecutors, law enforcement, defense counsel, and courts identify actual perpetrators and develop training tools, policies, and procedures that can prevent wrongful convictions. The reviews may also result in the identification of systemic issues related to prior practices and errors and/or new forensic practices that can contribute to preventing wrongful convictions. Public safety is adversely impacted by delays in the identification and apprehension of actual perpetrators. Exonerations based on false testimony, for example, primarily occur in murder cases, meaning that violent perpetrators remain on the street, potentially committing further crimes. URLPWC funding will support both the review of post-conviction claims of innocence and prosecutorial efforts to address violent crime and improve criminal prosecution, resulting in safer neighborhoods.

This Notice of Funding Opportunity (NOFO) supports implementation and evaluation of a comprehensive public health approach to suicide prevention. Such an approach includes strong leadership as the convener of multi-sectoral partnerships; prioritizes data to identify vulnerable populations and to better characterize risk (e.g., relationship, job/financial, mental health problems) and protective factors (e.g. connectedness, hope, resilience) impacting suicide; leverages current prevention practices and fills gaps by selecting multiple and complementary strategies with the best available evidence using CDC's Preventing Suicide: A Technical Package of Policy, Programs, and Practices; rigorously evaluates the overall approach and individual activities; feeds data back into the system for quality improvement and sustainability; and effectively communicates results. The purpose of this NOFO is to implement and evaluate this approach to suicide prevention, with attention to vulnerable populations (e.g., veterans, tribal populations, rural communities, LGBTQ, homeless, other) that account for a significant proportion of the suicide burden and have suicide rates greater than the general population in a jurisdiction(s) (e.g., state, city/county, tribe). In today's increasingly networked, distributed, and asynchronous world, cybersecurity involves hardware, software, networks, data, people, and integration with the physical world. Society's overwhelming reliance on this complex cyberspace, however, has exposed its fragility and vulnerabilities that defy existing cyber-defense measures; corporations, agencies, national infrastructure and individuals continue to suffer cyber-attacks. Achieving a truly secure cyberspace requires addressing both challenging scientific and engineering problems involving many components of a system, and vulnerabilities that stem from human behaviors and choices. Examining the fundamentals of security and privacy as a multidisciplinary subject can lead to fundamentally new ways to design, build and operate cyber systems, protect existing infrastructure, and motivate and educate individuals about cybersecurity. The goals of the SaTC program are aligned with the National Science and Technology Council's (NSTC) Federal Cybersecurity Research and Development Strategic Plan (RDSP) and National Privacy Research Strategy (NPRS) to protect and preserve the growing social and economic benefits of cyber systems while ensuring security and privacy. The RDSP identified six areas critical to successful cybersecurity research and development: (1) scientific foundations; (2) risk management; (3) human aspects; (4) transitioning successful research into practice; (5) workforce development; and (6) enhancing the research infrastructure.

The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

Hurricanes Florence, Michael, and Lane, Typhoons Yutu and Mangkhut, and of wildfires, volcanic eruptions, earthquakes and other natural disasters occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019.

<https://www.eda.gov/>

EDA announces general policies and application procedures for the Disaster Supplemental NOFO. Subject to the availability of funds, this investment assistance will help communities and regions devise and implement long-term economic recovery strategies through a variety of non-construction and construction projects, as appropriate, to address economic challenges in areas where a Presidential declaration of a major disaster was issued under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5121 et seq.) (Stafford Act) "as a result of Hurricanes Florence, Michael, and Lane, Typhoons Yutu and Mangkhut, and of wildfires, volcanic eruptions, earthquakes and other natural disasters occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019...". To be competitive, applications must clearly incorporate principles for enhancing the resilience (as defined under Section A.4, below) of the relevant community/region or demonstrate the integration of resilience principles into the investment project itself. Resilience is an essential component of any strategy for mitigating the potential for future disaster-related losses and adverse economic impacts for communities. Therefore, inclusion of resilience principles in the project is a necessary step to improve the capacity of the region to recover more quickly from future disaster events. Applicants must include a narrative attachment as a part of their application materials, describing in detail the nexus between their proposed project scope of work and disaster recovery and resilience efforts. The strength of the nexus to the disaster is drawn from the consequences of the relevant disaster(s) and the intended project outcomes that fulfill the community's specific post-disaster needs.
