Centinela Valley School District Awarded \$881,100 for Student Success Program

The Centinela Valley Union High School District has been awarded \$881,100 as part of the California Department of Education's Learning Communities for Student Success Program (LCSSP) Cohort 8. This grant aims to support programs that improve student outcomes by reducing truancy and assisting students at risk of dropping out or affected by crime.

The district plans to use the funds to enhance its existing initiatives, focusing on increasing student engagement and providing additional support services. Programs will include targeted interventions for chronically absent students, expanded counseling services, and the implementation of new extracurricular activities designed to keep students connected to their school community.

The winning application was written by California Consulting Project Manager Christine Stanley with the assistance of CVUHSD staff. "It's truly rewarding to see our efforts come to fruition and to know that this funding will make a significant difference in the lives of many students," said Ms. Stanley.

"Receiving the LCSSP grant is a significant milestone for our district. We are dedicated to using these funds to create a supportive and engaging environment for our students, ensuring that every student has the opportunity to thrive." stated CVUSD Superintendent Stephen Nellman

The LCSSP grant is a result of Proposition 47, which reallocates savings from reduced penalties for certain non-violent offenses to support local education agencies in their efforts to improve student success. The Centinela Valley School District's successful application highlights its dedication to addressing the unique challenges faced by its students and fostering a positive educational experience.
