<https://www.eda.gov/>

EDA announces general policies and application procedures for the Disaster Supplemental NOFO. Subject to the availability of funds, this investment assistance will help communities and regions devise and implement long-term economic recovery strategies through a variety of non-construction and construction projects, as appropriate, to address economic challenges in areas where a Presidential declaration of a major disaster was issued under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5121 et seq.) (Stafford Act) "as a result of Hurricanes Florence, Michael, and Lane, Typhoons Yutu and Mangkhut, and of wildfires, volcanic eruptions, earthquakes and other natural disasters occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019...". To be competitive, applications must clearly incorporate principles for enhancing the resilience (as defined under Section A.4, below) of the relevant community/region or demonstrate the integration of resilience principles into the investment project itself. Applicants must include a narrative attachment as a part of their application materials, describing in detail the nexus between their proposed project scope of work and disaster recovery and resilience efforts. The strength of the nexus to the disaster is drawn from the consequences of the relevant disaster(s) and the intended project outcomes that fulfill the community's specific post-disaster needs.

The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical

assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

Match: Not specified

Eligibility: Fire and rescue departments

<http://www.ffsupport.org/equipment-grants/>

As in any profession, there are often much-needed tools that fire and rescue department budgets simply don't provide for. Unlike most professions, however, the consequences of firefighting and rescue personnel not having these critical items can have tragic results for both victims and first responders alike. Many fire and rescue departments in the U.S. are under-funded and volunteer-based. This lack of funding often means that critical on-scene safety and rescue equipment is wanting. To assist these agencies, we make grants to purchase needed equipment. Our focus is on 1) funding equipment that is critical to emergency scene life and safety, 2) helping a functional department to function better, and 3) providing equipment that can be shared on a regional basis.

<https://www.eda.gov/>

EDA announces general policies and application procedures for the Disaster Supplemental NOFO. Subject to the availability of funds, this investment assistance will help communities and regions devise and implement long-term economic recovery strategies through a variety of non-construction and construction projects, as appropriate, to address economic challenges in areas where a Presidential declaration of a major disaster was issued under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5121 et seq.) (Stafford Act) "as a result of Hurricanes Florence, Michael, and Lane, Typhoons Yutu and Mangkhut, and of wildfires, volcanic eruptions, earthquakes and other natural disasters occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019...". To be competitive, applications must clearly incorporate principles for enhancing the resilience (as defined under Section A.4, below) of the relevant community/region or demonstrate the integration of resilience principles into the investment project itself. Resilience is an essential component of any strategy for mitigating the potential for future disaster-related losses and adverse economic impacts for communities. Therefore, inclusion of resilience principles in the project is a necessary step to improve the capacity of the region to recover more quickly from future disaster events. Applicants must include a narrative attachment as a part of their application materials, describing in detail the nexus between their proposed project scope of work and disaster recovery and resilience efforts. The strength of the nexus to the disaster is drawn from the consequences of the relevant disaster(s) and the intended project outcomes that fulfill the community's specific post-disaster needs.

- 1) *Education:* Education is the primary focus of the Foundation. The Foundation supports education programs in K-12, at both public and private schools, that seek to solve the existing problems in Los Angeles area schools. In addition, the Foundation provides funds to private secondary schools, colleges and universities for student financial assistance, in the form of both scholarships and loan programs. The best chance a young person has to reach that goal is to stay in school, inside a functioning family, and outside the juvenile justice system. To that end, the Foundation supports programs that deal with issues such as the high drop-out rate, lack of sufficient health care, substance abuse and violence. In addition, the Foundation will consider programs that address poverty issues and assist the economically disadvantaged. In today's increasingly networked, distributed, and asynchronous world, cybersecurity involves hardware, software, networks, data, people, and integration with the physical world. Society's overwhelming reliance on this complex cyberspace, however, has exposed its fragility and vulnerabilities that defy existing cyber-defense measures; corporations, agencies, national infrastructure and individuals continue to suffer cyber-attacks. Achieving a truly secure cyberspace requires addressing both challenging scientific and engineering problems involving many components of a system, and vulnerabilities that stem from human behaviors and choices. Examining the fundamentals of security and privacy as a multidisciplinary subject can lead to fundamentally new ways to design, build and operate cyber systems, protect existing infrastructure, and motivate and educate individuals about cybersecurity. The goals of the SaTC program are aligned with the National Science and Technology Council's (NSTC) Federal Cybersecurity Research and Development Strategic Plan (RDSP) and National Privacy Research Strategy (NPRS) to protect and preserve the growing social and economic benefits of cyber systems while ensuring security and privacy. The RDSP identified six areas critical to successful cybersecurity research and development: (1) scientific foundations; (2) risk management; (3) human aspects; (4) transitioning successful research into practice; (5) workforce development; and (6) enhancing the research infrastructure.

The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial

process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

<https://www.eda.gov/>

EDA announces general policies and application procedures for the Disaster Supplemental NOFO. Subject to the availability of funds, this investment assistance will help communities and regions devise and implement long-term economic recovery strategies through a variety of non-construction and construction projects, as appropriate, to address economic challenges in areas where a Presidential declaration of a major disaster was issued under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5121 et seq.) (Stafford Act) "as a result of Hurricanes Florence, Michael, and Lane, Typhoons Yutu and Mangkhut, and of wildfires, volcanic eruptions, earthquakes and other natural disasters occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019...". To be competitive,

applications must clearly incorporate principles for enhancing the resilience (as defined under Section A.4, below) of the relevant community/region or demonstrate the integration of resilience principles into the investment project itself. Resilience is an essential component of any strategy for mitigating the potential for future disaster-related losses and adverse economic impacts for communities. Therefore, inclusion of resilience principles in the project is a necessary step to improve the capacity of the region to recover more quickly from future disaster events. Applicants must include a narrative attachment as a part of their application materials, describing in detail the nexus between their proposed project scope of work and disaster recovery and resilience efforts. The strength of the nexus to the disaster is drawn from the consequences of the relevant disaster(s) and the intended project outcomes that fulfill the community's specific post-disaster needs.
