In 2018, OPSA launched an effort to develop of a quantitative system-dynamic model of the opioid crisis to help FDA a) understanding the complexity of the interconnected mechanisms of the crisis, and b) assess potential impacts (intended and unintended) of possible policy actions to address the crisis. In Sept 2019, OPSA awarded a 1-year cooperative agreement (Harvard/Mass General; FDA's RFA-FD-19-026) to complete an initial version of the model ready for policy analysis, and in Aug 2020, OPSA awarded a 1-year cooperative agreement (Harvard/Mass General; FDA's RFA-FD-20-031) to account for societal outcomes beyond overdose as well as cost-effectiveness of potential policies. The current proposal will expand the FDA's model to more comprehensively incorporate fentanyl, stimulants and polysubstance use and their interactive effects on opioids use, misuse, addiction, use disorder treatment, and associated outcomes. The main focus of this project would be on modeling the growing number of opioid overdose deaths involving people who are primarily stimulant or polysubstance users, as an important emerging aspect of the opioid crisis. The research will also include quantification of the effects of harm reduction approaches (e.g.,

naloxone distribution to opioid users, increasing treatment availability for Opioid Use Disorder [OUD] on overdoses involving fentanyl and other polysubstance use. Additionally, the research will identify and incorporate aspects of mental health that are feasible for inclusion into the model.

The HHS Office of Minority Health is offering funding to support State and local collaborative teams in implementing a methodological framework and strategies for assessing and addressing structural racism in health policies, developed through a complementary policy academy initiative. In particular, awardees will: (1) Obtain governmental and public buy-in for engaging in this policy collaborative endeavor; (2) Create a multi-sector team (e.g., comprised of leadership from the governor's/mayor's office and health, behavioral health, child welfare, justice, education, commerce, community service and other agencies, and from community organizations); (3) Conduct a review of existing policies to identify the areas primed for a structural racism assessment; (4) Develop or revise a policy (or policies) to address structural racism and improve health outcomes; (5) Implement the new/revised policy and evaluate its impact on health outcomes for racial and ethnic minorities within their jurisdiction; and (6) Create and implement strategies to communicate, sustain and spread policies resulting in improved health outcomes for racial and ethnic minorities. **BACKGROUND:** Racial and ethnic minority populations experience a number of disparities which contribute to poor health outcomes. Structural racism, evidenced in residential segregation, inequitable allocation and quality of services and resources such as health care and education, disproportionate contact with the justice system, and lack of access to employment opportunities, plays a persistent and large role in historical disadvantage and supports the persistence of racial and ethnic health disparities.
