JFAA was reauthorized and updated in 2016 through passage of the Justice For All Reauthorization Act (JFARA). The reauthorization established the Effective Administration of Criminal Justice Act of 2016, which added two new activities to JFAA through an amendment to the Edward Byrne Memorial Justice Assistance Grant (JAG) statute. The first requires that each JAG [Link to BJA JAG Page] applicant include with its application a "comprehensive statewide plan detailing how grants received under this section will be used to improve the administration of the criminal justice system." Each plan must be updated every 5 years, with annual progress reports. Second, the JFARA created a mandatory carve-out of JAG funds that will be used to provide technical assistance to states and local governments under two areas: 1. Support to develop and implement required statewide strategic plans to assist policy makers with allocation of JAG resources; and 2. Support to meet the obligations established by the Sixth Amendment to the U.S. Constitution.

The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

**** New! National Endowment for the Humanities: Infrastructure and Capacity Building Challenge**

Grants

Deadline: May 15, 2019

Amount: Up to \$750,000

Match: Yes

Eligibility: Cities, counties, state governments, special districts, public and state-controlled institutions of higher education, Native American tribal governments, nonprofits

<https://www.neh.gov/grants/preservation/infrastructure-and-capacity-building-challenge-grants>

The mission of this Challenge Grants program is to strengthen the institutional base of the humanities by enabling infrastructure development and capacity building. Awards aim to help institutions secure long-term support for their core activities and expand efforts to preserve and create access to outstanding humanities materials. Applications are welcome from colleges and universities, museums, public libraries, research institutions, historical societies and historic sites, scholarly associations, state humanities councils, and other public and nonprofit humanities entities. Programs that involve collaboration among multiple institutions are eligible as well, but one institution must serve as the lead applicant of record that will be legally, programmatically, and fiscally responsible for the award. Through these awards organizations can increase their humanities capacity through capital expenditures to support the design, purchase, construction, restoration, or renovation of facilities for humanities activities and the purchase of equipment and software. Such expenditures bring long-term benefits to the institution and to the humanities more broadly. Challenge grants may also support long-term humanities projects with funds invested in a restricted, short-term endowment or other investment fund (or spend-down fund) that generate expendable earnings to support and enhance ongoing humanities activities. Eligible activities include the preservation and conservation of humanities materials, and the sustaining of digital infrastructure for the humanities. Fundraising is a critical part of NEH Challenge grant awards: up to 10 percent of total funds (federal matching funds plus certified gifts) may be used for fundraising costs during the period of performance. Challenge funds (both federal matching funds and required nonfederal gifts) must enhance the humanities in the long term. Challenge grants should not merely replace funds already being expended, but instead should reflect careful strategic planning to strengthen and enrich an institution's humanities activities. Institutions may use challenge funds to meet both ongoing and one-time humanities-related costs, provided that the long-term benefit of the expenditure can be demonstrated.

U.S. National Endowment for the Humanities: Preservation and Access Education and Training

Deadline: May 15, 2019

Amount: Up to \$350,000

Match: No

Eligibility: Counties, special districts, state governments, nonprofits, cities, private, public and state-controlled institutions of higher education, Native American tribal governments

<https://www.neh.gov/grants/preservation/preservation-and-access-education-and-training>

The Preservation and Access Education and Training program supports the development of knowledge and skills among professionals responsible for preserving and establishing access to humanities collections. Thousands of libraries, archives, museums, and historical organizations across the country maintain important collections of books and manuscripts, photographs, sound recordings and moving images, archaeological and ethnographic artifacts, art and material culture collections, electronic records, and digital objects. The challenge of preserving and making accessible such large and diverse holdings is enormous, and the need for knowledgeable staff is significant and ongoing. Preservation and Access Education and Training grants are awarded to organizations that offer national, regional, or statewide education and training programs across the pedagogical landscape and at all stages of development. Grants aim to help the staff of cultural institutions, large and small, obtain the knowledge and skills needed to serve as effective stewards of humanities collections. Grants support projects that prepare the next generation of preservation

professionals, as well as projects that introduce heritage practitioners to new information and advances in preservation and access practices.

U.S. National Endowment for the Humanities: Research and Development

Deadline: May 15, 2019

Amount: Up to \$350,000

Match: No

Eligibility: Counties, special districts, state governments, nonprofits, cities, private, public and state-controlled institutions of higher education, Native American tribal governments

<https://www.neh.gov/grants/preservation/research-and-development>

The Research and Development program supports projects that address major challenges in preserving or providing access to humanities collections and resources. These challenges include the need to find better ways to preserve materials of critical importance to the nation's cultural heritage—from fragile artifacts and manuscripts to analog recordings and digital assets subject to technological obsolescence—and to develop advanced modes of organizing, searching, discovering, and using such materials. This program recognizes that finding solutions to complex problems often requires forming interdisciplinary project teams, bringing together participants with expertise in the humanities; in preservation; and in information, computer, and natural science. The exact mix of specialists will depend on the particular nature of the project. Your project team should embody a well-defined humanities perspective that can frame your objectives and guide the project to successful completion. Such a perspective may be provided by members of an advisory committee, consultant(s), a project co-director, or another participant. All projects must demonstrate how advances in preservation and access would benefit the cultural heritage community in supporting humanities research, teaching, or public programming.

Experimentation, reuse, and extensibility are hallmarks of this program, leading to innovative work that can scale to enhance scholarly research, teaching, and public programming in the humanities. This program is offered twice per year.

Proposals are welcome for digital initiatives in any area of the humanities. Through a special partnership with NEH and pending the availability of appropriated funds, the Institute of Museum and Library Services (IMLS) anticipates providing additional funding to this program to encourage innovative collaborations between museum or library professionals and humanities professionals to advance preservation of, access to, use of, and engagement with digital collections and services. IMLS and NEH may jointly fund some DHAG projects that involve collaborations with museums and/or libraries. Digital Humanities Advancement Grants may involve • creating or enhancing experimental, computationally-based methods, techniques, or infrastructure that contribute to the humanities; • pursuing scholarship that examines the history, criticism, and philosophy of digital culture and its impact on society; or • conducting evaluative studies that investigate the practices and the impact of digital scholarship on research, pedagogy, scholarly communication, and public engagement.

The Foundation's goal is to assist individuals in becoming successful, self-sustaining, contributing citizens. The Foundation is interested in programs that break down any barrier that prevents a person from continuing to grow and learn through grant programs including:

- 1) *Education:* Education is the primary focus of the Foundation. The Foundation supports education programs in K-12, at both public and private schools, that seek to solve the existing problems in Los Angeles area schools. These grants for education reform can be made directly to the schools or to independent organizations which are closely involved with this issue. In addition, the Foundation provides funds to private secondary schools, colleges and universities for student financial assistance, in the form of both scholarships and loan programs. Favor is given to those programs directed at talented middle-income students who are unable to obtain assistance from sources specifically available to low income students.
- 2) *Community, Health, & Social Services:* The Foundation is also committed to improving the quality of life in the local community. The Foundation supports programs that encourage all individuals to reach their fullest potential. The best chance a young person has to reach that goal is to stay in school, inside a functioning family, and outside the juvenile justice system. To that end, the Foundation supports programs that deal with issues such as the high drop-out rate, lack of sufficient health care, substance abuse and violence. In addition, the Foundation will consider programs that address poverty issues and assist the economically disadvantaged. Programs aimed at solutions to or the prevention of these problems are favored.
