UPCOMING FUNDING (ALL CATEGORIES)

U.S. Department of Health and Human Services: Emergency Triage, Treat, and Transport (ET3) Model

Deadline: TBD. Forecasted release April 6, 2020 *[Final guidelines not available as of 6/22/20](#)*

Amount: TBD

Match: No

Eligibility: Special districts, nonprofits, cities, counties, tribal governments, faith-based organizations

<https://www.grants.gov/web/grants/view-opportunity.html?oppId=326039>

The Emergency Triage, Treat, and Transport (ET3) model is a voluntary, five-year payment model that will provide greater flexibility to ambulance care teams to address emergency health care needs of Medicare Fee-for-Service (FFS) beneficiaries following a 911 Call. ET3 consists of three interventions: the two treat and transport interventions described in the Request for Applications and the triage intervention described in this Notice of Funding Opportunity (NOFO). Together, these interventions make up a comprehensive model for potentially improving the quality of care and lowering costs to Medicare by reducing avoidable transports to hospital emergency departments (EDs) and avoidable inpatient admissions. Through the ET3 Model NOFO, Centers for Medicare & Medicaid Services (CMS) will fund Recipients to establish or expand a Medical Triage Line. Eligible applicants are state and local governments, their designees, or other entities that operate or have oversight over an emergency communications center that receives 911 Calls. A Medical Triage Line funded through the ET3 Model will allow existing 911 systems to redirect Callers with non-emergency conditions to appropriate care alternatives.

PLHA funds will be available for eligible housing-related projects and programs to assist in addressing the unmet housing needs of local communities. Annual revenue was estimated in the 2018 Budget Act at approximately \$250 million, which would make approximately \$165 million available for the PLHA program annually. Actual amounts will depend on the number of real estate documents subject to the Building Homes and Jobs Trust Fund fee recorded in a given calendar year.

The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

As in any profession, there are often much-needed tools that fire and rescue department budgets simply don't provide for. Unlike most professions, however, the consequences of firefighting and rescue personnel not having these critical items can have tragic results for both victims and first responders alike. Many fire and rescue departments in the U.S. are under-funded and volunteer-based. This lack of funding often means that critical on-scene safety and rescue equipment is wanting. To assist these agencies, we make grants to purchase needed equipment. Our focus is on 1) funding equipment that is critical to emergency scene life and safety, 2) helping a functional department to function better, and 3) providing equipment that can be shared on a regional basis.

⚠️ New! U.S. Department of Health and Human Services: Rural Communities Opioid Response

Program – Neonatal Abstinence Syndrome (RCORP-NAS)

Deadline: July 20, 2020

Amount: Up to \$500,000

Match: No

Eligibility: States, small businesses, nonprofits, IHEs, cities, counties, public housing authorities, tribal governments and organizations, special districts, independent school districts

<https://www.grants.gov/web/grants/view-opportunity.html?oppId=324230>

The Rural Communities Opioid Response Program (RCORP) is a Health Resources and Services Administration (HRSA) multi-year initiative aimed at reducing the morbidity and mortality of substance use disorder (SUD), including opioid use disorder (OUD), in high-risk, rural communities. This notice announces the opportunity to apply for funding under RCORP-Neonatal Abstinence Syndrome (RCORP-NAS). The purpose of the RCORP- NAS project is to advance RCORP's overall goal and reduce the incidence and impact of Neonatal Abstinence Syndrome (NAS) in rural communities by improving systems of care, family supports, and social determinants of health. In 2017, the U.S. Department of Health and Human Services (HHS) published a five-point Strategy to Combat Opioid Abuse, Misuse, and Overdose, to outline concrete steps that local communities can take to address the opioid epidemic. In alignment with the HHS Five-Point Strategy, and as part of the RCORP initiative, RCORP- NAS award recipients will implement a set of SUD/OUD Prevention, Treatment, and Recovery Strategies as outlined in Section IV.2. These strategies are grounded in evidence-based or promising practice models. Applicants are encouraged to select the strategies that best address the needs identified in their respective service areas and target populations. The Target Population for this grant is pregnant women, mothers, and women of childbearing age who have a history of, or who are at risk for, SUD/OUD and their children, families, and caregivers who reside in HRSA-designated rural areas, as defined by the Rural Health Grants Eligibility Analyzer. Given the complex and multifaceted nature of SUD/OUD and NAS, as well as the need to secure community buy-in and social services support, HRSA requires that RCORP-NAS applicants operate within a broad, multi-sectoral consortium, as outlined in Section III.1. Consortia should be able to operationalize their proposed work plans immediately upon receipt of award. The primary focus of this grant is to reduce incidence of NAS and OUD by improving local conditions and creating systems change. However, recognizing that many individuals with OUD have co-occurring substance use disorders, consortia may also choose to address additional substances of concern in the target population. Please note that no competitive advantage, funding priority, or preference is associated with proposing activities that address other SUD-related needs, including those related to methamphetamine or alcohol.

- 1) *Education:* Education is the primary focus of the Foundation. The Foundation supports education programs in K-12, at both public and private schools, that seek to solve the existing problems in Los Angeles area schools. These grants for education reform can be made directly to the schools or to independent organizations which are closely involved with this issue. In addition, the Foundation provides funds to private secondary schools, colleges and universities for student financial assistance, in the form of both scholarships and loan programs. Favor is given to those programs directed at talented middle income students who are unable to obtain assistance from sources specifically available to low income students.
- 2) *Community, Health, & Social Services:* The Foundation is also committed to improving the quality of life in the local community. The Foundation supports programs that encourage all individuals to reach their fullest potential. The best chance a young person has to reach that goal is to stay in school, inside a functioning family, and outside the juvenile justice system. To that end, the Foundation supports programs that deal with issues such as the high drop-out rate, lack of sufficient health care, substance abuse and violence. In addition, the Foundation will consider programs that address poverty issues and assist the economically disadvantaged. Programs aimed at solutions to or the prevention of these problems are favored. Although the Foundation recognizes the importance of Community, Health, and Social Services, it is not the Foundation's primary funding focus.

The purpose of the RCORP- NAS project is to advance RCORP's overall goal and reduce the incidence and impact of Neonatal Abstinence Syndrome (NAS) in rural communities by improving systems of care, family supports, and social determinants of health. In 2017, the U.S. Department of Health and Human Services (HHS) published a five-point Strategy to Combat Opioid Abuse, Misuse, and Overdose, to outline concrete steps that local communities can take to address the opioid epidemic. In alignment with the HHS Five-Point Strategy, and as part of the RCORP initiative, RCORP- NAS award recipients will implement a set of SUD/OUD Prevention, Treatment, and Recovery Strategies as outlined in Section IV.2. These strategies are grounded in evidence-based or promising practice models. Applicants are encouraged to select the strategies that best address the needs identified in their respective service areas and target populations. The Target Population for this grant is pregnant women, mothers, and women of childbearing age who have a history of, or who are at risk for, SUD/OUD and their children, families, and caregivers who reside in HRSA-designated rural areas, as defined by the Rural Health Grants Eligibility Analyzer. Given the complex and multifaceted nature of SUD/OUD and NAS, as well as the need to secure community buy-in and social services support, HRSA requires that RCORP-NAS applicants operate within a broad, multi-sectoral consortium, as outlined in Section III.1. Consortia should be able to operationalize their proposed work plans immediately upon receipt of award. The primary focus of this grant is to reduce incidence of NAS and OUD by improving local conditions and creating systems change. However, recognizing that many individuals with OUD have co-occurring substance use disorders, consortia may also choose to address additional substances of concern in the target population. Please note that no competitive advantage, funding priority, or preference is associated with proposing activities that address other SUD-related needs, including those related to methamphetamine or alcohol.

In today's increasingly networked, distributed, and asynchronous world, cybersecurity involves hardware, software, networks, data, people, and integration with the physical world. Society's overwhelming reliance on

this complex cyberspace, however, has exposed its fragility and vulnerabilities that defy existing cyber-defense measures; corporations, agencies, national infrastructure and individuals continue to suffer cyber-attacks. Achieving a truly secure cyberspace requires addressing both challenging scientific and engineering problems involving many components of a system, and vulnerabilities that stem from human behaviors and choices. Examining the fundamentals of security and privacy as a multidisciplinary subject can lead to fundamentally new ways to design, build and operate cyber systems, protect existing infrastructure, and motivate and educate individuals about cybersecurity. The goals of the SaTC program are aligned with the National Science and Technology Council's (NSTC) Federal Cybersecurity Research and Development Strategic Plan (RDSP) and National Privacy Research Strategy (NPRS) to protect and preserve the growing social and economic benefits of cyber systems while ensuring security and privacy. The RDSP identified six areas critical to successful cybersecurity research and development: (1) scientific foundations; (2) risk management; (3) human aspects; (4) transitioning successful research into practice; (5) workforce development; and (6) enhancing the research infrastructure.

The Office for Victims of Crime (OVC) supports victims of mass violence and terrorism through the Antiterrorism and Emergency Assistance Program (AEAP). This program is designed to supplement the resources and services of entities responding to these acts when a jurisdiction has been overwhelmed after such an incident. Funding for this program comes from the Antiterrorism Emergency Reserve (the Emergency Reserve). AEAP grants are a mechanism by which the Director of OVC may award supplemental crime victim compensation and assistance to respond to an act of domestic terrorism or mass criminal violence. The criminal act has to be of sufficient magnitude that the jurisdiction cannot provide needed services to victims of the incident with existing resources and it places an undue financial hardship on the jurisdiction's ability to respond to victims of other crimes in a timely and comprehensive manner. AEAP funds can assist with crisis response in the initial aftermath of an event; help victims adapt, restore their equilibrium, and deal with the consequences of the event; and facilitate victim participation in the judicial process. AEAP is also designed to supplement state crime victim compensation administrative agencies that reimburse victims for out-of-pocket expenses related to their victimization. Additionally, training and technical assistance funds are available to identify resources, assess needs, coordinate services to victims, and develop strategies for responding to an event.

<https://www.eda.gov/>

EDA announces general policies and application procedures for the Disaster Supplemental NOFO. Subject to the availability of funds, this investment assistance will help communities and regions devise and implement long-term economic recovery strategies through a variety of non-construction and construction projects, as appropriate, to address economic challenges in areas where a Presidential declaration of a major disaster was issued under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5121 et seq.) (Stafford Act) "as a result of Hurricanes Florence, Michael, and Lane, Typhoons Yutu and Mangkhut, and of wildfires, volcanic eruptions, earthquakes and other natural disasters occurring in calendar year 2018, and tornadoes and floods occurring in calendar year 2019...". To be competitive, applications must clearly incorporate principles for enhancing the resilience (as defined under Section A.4, below) of the relevant community/region or demonstrate the integration of resilience principles into the investment project itself. Resilience is an essential component of any strategy for mitigating the potential for future disaster-related losses and adverse economic impacts for communities. Therefore, inclusion of resilience principles in the project is a necessary step to improve the capacity of the region to recover more quickly from future disaster events. Applicants must include a narrative attachment as a part of their application materials, describing in detail the nexus between their proposed project scope of work and disaster recovery and resilience efforts. The strength of the nexus to the disaster is drawn from the consequences of the relevant disaster(s) and the intended project outcomes that fulfill the community's specific post-disaster needs.
