

CISA Releases Handbook on Securing Small and Medium-Sized Business Supply Chains

The Cybersecurity and Infrastructure Security Agency (CISA) has released of a new product, *Securing Small and Medium-Sized Business (SMB) Supply Chains: A Resource Handbook to Reduce Information and Communication Technology Risks*.

Developed by the Information and Communications Technology (ICT) Supply Chain Risk Management (SCRM) Task Force, the handbook provides an overview of the highest supply chain risk categories commonly faced by ICT SMBs, including cyber risks. It also contains several use cases and applicable resources to assist ICT SMBs in identifying the supply chain security practices they can take to enhance their security.

The handbook was designed to provide supply chain guidance to SMBs that may have limited finances, share resources on how to enhance the SMB reporting and vetting processes when purchasing ICT, and offer methods and guidance to tackle the most common and highest priority risks faced by SMBs.
