

Let Your Business Flow Uninterrupted

with the NEW Bigleaf Wireless Connect

>>> Ensure uninterrupted business operations

With Bigleaf Wireless Connect, you can conveniently add LTE wireless connectivity to Bigleaf service plans and establish reliable business continuity, even during outages and brownouts.

>>> Stay ahead with superior connectivity

Wireless Connect is not just a backup; it's designed to plug directly into Bigleaf's network optimization router and enable:

- **Seamless failover:** Automatically switches to a resilient wireless connection during outages.
- **Adaptive Intelligence:** Smartly prioritizes critical applications like VoIP and POS systems.
- **Quick and easy setup:** LTE router delivers pre-configured for the Bigleaf SD-WAN router with carrier-activated 4G LTE plan.

Your business, your way.

High-speed, wireless internet connectivity even when ISP options are limited.

>>> Don't let connectivity be the bottleneck of your business potential

Bigleaf makes it easy to help businesses mitigate outages and optimize network connectivity with Wireless Connect. Work directly with Bigleaf and avoid data plan overage fees, the complexity of contract and billing management from multiple vendors, and dealing with unconnected support teams.
