Stop Covid before it enters your business

DTEL offers the latest thermal camera technologies, which are capable of highly accurate body temperature measurement $\pm 0.3^\circ$ (with blackbody). With built-in AI algorithm, you can measure multiple persons from up to 3-meter distance, enabling fast and non-contact access.

Human Body Temperature Measuring technology assists in preventing the spread of viral diseases by allowing for quick, accurate detection of elevated body temperatures. Thermal imaging equipment can easily be installed and implemented to detect elevated body temperature in environments such as airports, hospitals, clinics, office buildings, cruise ships, and any large public gathering location.
