

School Safety Continued

Officer Perez is on site keeping a careful eye on the building and grounds. He has years of experience as a Bridgeport police officer and is well experienced for this job. Our enhanced PA system ensures clear and quick communication among all faculty throughout all classrooms and buildings. Security cameras are positioned to see all areas of the campus and building; they are observed by Officer Perez and go directly to the Newtown police department.

We are blessed to have Nurse Bonnie with us 5 full days a week. She is a knowledgeable health professional who is here to assist students with a variety of needs from sore throats to medication monitoring/administration to bumps and bruises. St. Rose is a Nut free school; Nurse Bonnie and the faculty also work with families to develop a safety plan for other allergy and health issues.

Mrs. B, our Dean of Student Life, keeps a close eye and ear on the school climate. She is dedicated to helping every student thrive and ensuring that St. Rose School is a kind, trustworthy environment. Cheerleader and confidant, Mrs. B has students' best interests at heart.

Mr. G's favorite part of being Principal is speaking with children and hearing their thoughts about school. When he asks students how their day is going he means it sincerely and he truly listens to what they say. He is completely committed to keeping children safe and offering them a top notch education.

We are also grateful to our parents, grandparents and other family members who look out for our children. Together we make a great team. Your children are precious, thank you for entrusting them to us.
