

## **St. Rose Advanced Math Club - Gr. 6-8**

Did you know that the St. Rose Advanced Math Club is in it's 9th year? Over those years, since 2010 we have had over a hundred or more "Mathletes" enjoy after-school high level Math activities, problems and competitions.

We are proud of our record of winning the National Math Club's highest level award, the Gold Level Award, for the last 8 consecutive years! If you come into our Gathering Hall, check out the banners and the trophies we have won over the years!

We look forward to another exciting year of grade level Math problem-solving activities and fun helping our students grow and advance in their Math understanding.

Our first meeting will be Wednesday, September 19 from 3:10-4:10 PM. See you then, Mathletes!
