GREENEYE PARTNERS

Your ISO 2026 transition, done one of two ways.

ISO 9001 and ISO 14001 have been revised. Your management system doesn't need to be rebuilt, but your documents do: the clause numbers, the wording and several requirements no longer match the 2026 editions. Greeneye has already mapped every change. You choose who applies it.

What changed in 2026

Change planning (6.3):
New in 14001, expanded in 9001. Needs a new procedure and form

Risks and opportunities (6.1):
Each now determined, analyzed and evaluated. 14001 requires its own record

Context and scope (4.1 to 4.3):
Climate, biodiversity and resource conditions, plus new decision steps

Quality culture and ethics (5.1, 7.3):
New 9001 leadership duty and awareness topic

Documented information:
38 "maintain / retain" references rewritten across both standards

Audit and review (9.2, 9.3):
Objectives for every audit, conclusions in every review

The 9001 + 14001 bundle touches 24 documents: the manual, policy, 12 procedures, 9 forms and registers, and awareness training.
