

# TouchChat with WordPower Communication App (Basic/Intermediate)

OCTOBER 23, 2019

Catered to beginner or advanced editing and programming options of TouchChat communication app. This session will cover editing buttons and whole pages, copy and pasting features to make customizing quick, inserting photos, tips on searching the vocabulary database for best matched pictures, managing settings such as voices, speech rate, dwell times and hiding buttons. Also covered will be how to toggle between vocabularies and copy vocabularies for editing and customizing for your students.

## Learning Objectives

Participants will be able to:

- Recall the basic and intermediate features of TouchChat Wordpower communication app
- Distinguish the differences between various user grids and the rationale behind the auto navigational features of Wordpower grids.
- Edit/customize buttons, change field size and grid layouts.
- Manipulate basic setting features: changing display, voice settings, and text/font.
