WHEN THUNDER ROARS.....

National Weather Service: Florida leads the nation in deadly strikes? There is no safe place outside when thunderstorms are in the area. If you hear thunder, you are likely within striking distance of the storm. Just remember, When Thunder Roars, Go Indoors. Too many people wait far too long to get to a safe place when thunderstorms approach. Unfortunately, these delayed actions lead to many of the lightning deaths and injuries. * www.lightningsafety.noaa.gov/safetyhtml

The approach of summer is a reminder to us all of the need to recognize, and act to prevent, the harmful effects of excessive heat. Workers are particularly vulnerable to the health impacts of heat exposure. Workers may experience longer or more intense heat exposures and are more likely to engage in strenuous physical activity in the heat than the general public.
