

St. PHILIP'S
SCHOOL & COMMUNITY CENTER

The Annual PBL (Project-Based Learning) Showcase will take place Tuesday, February 26th, at 6 PM. The showcase features authentic projects that students in grades pre-K2 through 6th grade have engaged in for the past several months. The final products that will be presented to the public are the result of students voice and choice and address a broad range of issues that in some way connect to the class curriculum.

Here are a few of the driving questions that have been addressed:

How can we use dance to reflect the social injustices of the world and teach others the art of movement resistance as a means of healing our community?

How can we re-design buildings in our community to encourage families to move into our neighborhood?

What is the importance of passing on traditions to the next generation?

What people and places in ancient history are most important for students to learn?

How would you care for or protect an athlete from a particular sport injuries?

Who are Latino or Hispanic people and what are they really like?
