

Bringing pediatric specialty care closer to home.

ECU Health was created for the expressed purpose of helping the people of eastern North Carolina live their healthiest lives, their best lives. We are determined to reach the farthest parts of our communities to provide high-quality care.

In addition to the comprehensive, multidisciplinary care available in Greenville, the pediatric specialists of ECU Health offer services throughout the region across several disciplines—cardiology, gastroenterology, general surgery, hematology/oncology, nephrology and pulmonology.
