

Motility Procedure Ordering

ECU Health GI Motility and Pulmonary
Function Testing Center

Motility Procedure Ordering

To refer a patient for motility testing at ECU Health GI Motility and Pulmonary Function Testing Center, located on the campus of ECU Health Medical Center, providers who are not credentialed for these services should follow process outlined below.

Available Procedures

- Acid reflux study
- Breath hydrogen test
- Capsule endoscopy
- Anorectal manometry
- Esophageal manometry (with and without 24-hour pH impedance)

Required Referral Documentation

- Recent office visit note (within the last three – six months) from a provider in your clinic.
- Demographic and insurance information (if not updated in the system).

Submit Referral in CareLink

All referrals for motility testing are reviewed by the motility nurse, who will determine whether the patient meets criteria for direct scheduling or requires an evaluation by our motility specialist prior to scheduling.

After logging into CareLink, please follow the steps below to submit referral:

1. From the home screen, click [Place Order] and search for your patient.
2. Choose the ordering provider from the drop-down menu.
3. In the *New procedure* field, type: REF13 or AMB Referral to Cardiothoracic Surgery
 - a. **Referral Type:** Procedure
 - b. **Referral To dept:** ACAD CVS Thoracic
 - c. **Referral To provider:** Mohamed Khalaf, MD
 - d. **Scheduling instructions:** enter applicable CPT code and name of procedure requested.

CPT Code	Procedure Name
91010	Esophageal motility study
91037	Esophageal motility study w/impedance
Note: For all esophageal manometry procedures, you must list both CPT codes: 91010 and 91037	
91038	Acid reflux study
91122	Anorectal manometry
91065	Breath hydrogen test
91110	Capsule Endoscopy

4. Select appropriate diagnosis code(s) and upload required clinical, demographic, and insurance documentation.

Questions:

Questions:	Answer
1. Order Authorization	No auth required
2. Authorization start & end date:	N/A
3. If "Refer To" provider not found, enter provider Name/Location:	

Scheduling instructions: Patient needs to be scheduled for: CPT codes: 91010 and 91037 - Esophageal motility study w/impedance.

Scheduling of Services

Once referral has been reviewed by the motility nurse, you should expect to see the following:

1. Directly scheduled for a procedure:

- Referral submitted by your clinic will not have a scheduled appointment attached to it. The *Referral Status* will be updated to **Authorized** and the *Scheduling Status* to **Clinical Review or Complete**.
- A new referral will be entered into the system with the *Referred by* provider shown as Dr. Mohamed Khalaf and the referred to department as EMC-GI Motility and Pulmonary Function Testing. This is the referral to review to obtain appointment details.

2. Evaluation with our motility specialist:

- Referral submitted by your clinic will have a scheduled appointment attached to it. This is the referral to review to obtain appointment details.
- The *Referral Status* will be updated to **Authorized** and the *Scheduling Status* will show as **Ready to be Scheduled or Scheduled**.

For questions regarding motility procedure scheduling, please call (252) 847-5890.
