

The long-awaited new GRAPE website was launched this week!

What you need to know initially:

The website domain is the same - grapelder.org.

Once you get to the main page you will see a purple "member area" at the top - click on that to login using your email address and then go to "forgot password" to set up your password - old passwords were NOT transferred. You can then edit your profile - make sure all your information is correct and add a photo!

ElderPages Directory - you can no longer update your own listing, and any requested changes need to come to the office.

Events - you will see GRAPE events and Member events separated now. If you had a member event posted on the old website it is moved to the new website. For any members wanting to add an event, you will see a submit event form now. Also, you will no longer get email when a new event is posted so, please make sure to read the weekly newsletter and check the website often.

This website is much more user friendly than the current one so you should be able to figure out most things on your own, but I will set up some ZOOM training times soon for those interested. In the meantime, feel free to reach out to me with questions.

NOTE - there are still a few things we are working on and there could be some initial glitches, so thank you for your patience!
