Data Science

DATA ADVENTURES

PLAYTEST GROUP

Mobile Makerspace

Did you know that names, music and slang all involve data? Here's a cool way to get into it!

We invite you to join the next phase of our Data Adventures project, open to all teachers, including those who did not participate in the initial design phase. Experience lessons through both a student lens and a pedagogical lens, providing insights for final development. We're seeking middle school educators to help us refine the lessons we've co-created by playtesting them. Your feedback will be essential in perfecting these engaging, real-world data learning activities.
