## Fantastic Beasts Found

Over 125 kids have participated in our Fantastic Beast scavenger hunt that is based on the book, *Fantastic Beasts and Where to Find Them*, written by J.K. Rowling under the fictitious pen name of Newt Scamander. The participants use their observational skills to locate photos of 15 magical creatures hiding throughout the children's division of the library! Once the young Magizoologists-in-training have spotted all 15 creatures, they can claim their prize from the librarian at the desk. The participants have been excited not only to try and spot these magical creatures but also to learn some interesting facts about them. For instance, the Niffler is often used by goblins to dig for treasure due to its excellent burrowing skills and strong attraction to anything shiny.
