# Air Conditioning Diagnostics & Repair

In-Person Training,  
sponsored by

This course, delivered by MACS Certified Instructors, brings the professional technician up-to-date on the latest air-conditioning diagnostic techniques, service and repair practices. Course can be customized to support MACS Section 609 Refrigerant Recycling and Recovery Certification Program training. During the course, participants will:

- o Understand the various HVAC system designs
- o Know the operating characteristics of various refrigerants and oils
- o Understand computer controls used in air conditioning systems
- o Comprehend various diagnostic testing techniques and identify tools necessary to service, maintain, and diagnose air conditioning systems

**Members: \$45**  
**Non-Members: \$55**  
includes dinner and  
training

for shop  
owners and  
technicians
