

Practical Labscope Application Testing

in-person training with
Jim Wilson

In this second class we will cover:

Do we have voltage?

Checks for battery, charging systems proper operation.

Do we have compression?

Testing relative compression testing with a High current probe.

Using a Pressure Pulse sensor.

Is there spark?

Ignition testing with a capacitive probe and low amp probe.

Testing the different type of Coil-On Plug systems.

Is there fuel?

Current Ramping Fuel Pumps and fuel injectors, along with Voltage patterns.

Do we have a failure to communicate?

Checks for CAN and communication protocols issues.
