Cedar Rapids, IA 52404

Steering & Suspension

In-person training with
Andrew Sexton, David Hall, and Colten Ramsey

This class will provide attendees with a practical, hands-on understanding of today's steering and suspension systems. Participants will review key components, common wear patterns, inspection best practices, and diagnostic procedures used to identify handling concerns, noises, vibrations, alignment-related issues, and ride quality problems. The course will also cover how to communicate findings clearly, document needed repairs, and make accurate recommendations that improve vehicle safety, performance, and customer confidence.

Members: \$35
Non-Members: \$45

Includes dinner
and training

**For technicians,
managers, and
owners**
