

## Central MO Chapter

# Lab Scope Live: Part 1

Tuesday, Oct 18, 2022

6:00 - 9:00pm

Midwest Autoworx  
1300 W Ashley Rd  
Boonville, MO 65233

Live-Car Training with  
**Kevin Leiby**

This class is part 1 of an ongoing series of oscilloscope classes that will be delivered in a live vehicle setting. This live car class is designed to familiarize the technician with scope foundations, such as the selection and use of the proper probe for the desired capture. Setting the channels up properly when it comes to voltage settings, time bases, the importance of sample rates and AC or DC coupling and what are the benefits of both. Learn about the different types of triggers, slope and how and when to use them to your ad-vantage. Learn to take advantage of the filtering and measurement capabilities of your scope. Learn different ways to connect to a circuit or connector for proper signal acquisition without causing harm to terminals or circuits. Come join us to lay the foundation of where we can go when we learn to use this incredibly powerful tool to its potential.

**Members: \$65**  
**Non-Members: \$105**

includes dinner  
and training

for shop  
owners,  
managers and  
technicians
