

PicoScope: Tests & Techniques

in-person training with
Matt Fanslow

This hands-on course will cover the practical tests and techniques to diagnose complex vehicle issues. Attendees will learn to set up their scope to capture the necessary waveforms needed to confirm a diagnosis. Tests covered will include but not be limited to: Camshaft/Crankshaft Correlation, Relative Compression, Battery/Alternator Charging and Voltage, ignition system voltage and current, as well as fuel injector current ramp and voltage testing and more. Attendees will have a solid understanding of these practical tests to immediately utilize them in their own shops.
