New Tax Law and Business Succession

In-Person Training with
Patrick Conner,
Partner, Husch Blackwell

Lack of proper business succession planning can leave family-owned and privately held businesses vulnerable to high taxes, ownership disputes, loss of cash flow, default on loans and potentially business failure when the owner of a shop retires or dies.

This seminar will include information on income, capital gains, and estate taxes and discussion of estate and succession planning for business owners.

Patrick Conner combines an intentionally practical approach with a deep grasp of the law to provide clients with advantageous strategies to accomplish their estate and succession planning goals.

As a member of the Financial Services industry group at Husch Blackwell LLP, Patrick focus on estate planning, estate and trust administration, and organizational tax and succession planning for privately held businesses. He has designed and implemented numerous plans to minimize income, gift, estate and generation-skipping transfer taxes that are associated with succession planning for individuals and privately held businesses.
