

## Central Missouri Chapter

# Domestic Drivability Diagnostics and Tips

in-person training with  
**Philip Austin**

sponsored by

THE IGNITION SPECIALIST™

THE SENSOR SPECIALIST™

Thursday, April 13, 2023

6:30 PM - 8:30 PM

Conley Road Hy-Vee  
25 Conley Road  
Columbia, MO 65203

### Learning Objective

To effectively communicate vehicle diagnosis to the service advisor and creating best practices to streamline the diagnostic process through “real-world” data and cases studies.

### Key Points Covered:

- Discussing the inputs, processing, and outputs at the core of today’s engine management platforms.
- Understanding Domestic fuel trims verses OBDII generic fuel trims to fast track the diagnostic process to find the root cause of some driveability issues.
- Using scan-tool data PID information to its fullest potential. Applying logical methods to streamline the diagnostic process on Domestic applications.
- Domestic vehicle systems, driveability diagnostic steps, and walking through the scan tool data PIDs to fix the car right the first time.

Members - \$35  
Non-Members - \$50

Includes dinner  
and training

for  
shop owners,  
managers, and  
technicians
