Shop Owner Roundtable

What is the best part of attending training? The discussions you have with other automotive service professionals about what they are doing in their business.

Join us as we come together to learn from each other to discuss different areas of your business. Come with a topic you are interested in learning more about (i.e. comebacks, communication between advisor and technician, uniforms, employee benefits, etc). You are guaranteed to come away with ideas you can implement in your shop the next day!
