

Kansas City Chapter

The Ins and Outs of R1234yf Air Conditioning Systems

in-person training with

Dorman

Sponsored by:

This class/seminar will cover all the components of the R1234yf air conditioning system along with step by step instructions of how to test, recover, evacuate, recharge and add oil/dye to the system. We will have a R1234yf machine connected to a vehicle and provide you with the dos and don'ts when performing system service and repair. At over \$70.00 a pound you don't want to guess but rather test and get the job don't right the first time. Upon the completion of this class you will have a better understanding of the refrigerant, system, testing, equipment use and getting the system back to its normal state. Today's vehicles are more involved so it's important to use a proper diagnostic approach.

Tuesday, April 18, 2023

5:30-9:00pm

TBD

Members: \$30
Non-Members: \$45
includes dinner
and training

For shop
owners,
managers, and
technicians
