Tire Repair & TPMS Service

live, hands-on training with
Ryan Schmidt & Dennis Vock

During our clinic, we will go over the proper, industry standard, way to fix a flat tire. This will ensure that the customer is 100% safe during the remaining life of that tire. Our goal is to show technicians, shop owners and service writers what to look for when initially taking that tire off the rim and how to gauge if it's repairable or not. This class will show these technicians how to properly fix a flat tire and to limit their liability, along with the shop owners, of a potential tire failure down the road.

Dennis Vock is the Midwest U.S. Regional Sales Manager, for 31 Incorporated. Dennis is widely known throughout the aftermarket as one of the leading authorities and trainers on proper tire repair procedures. He has addressed and trained many of the top national accounts including automotive parts chains, commercial parts distributors, industry leading tire distributors and tire store chains not only in the United States but also internationally.

Ryan Schmidt is in Midwest Regional Sales, for 31 Incorporated. Ryan joined 31 Inc. in May 2014. He is a Certified Tire Industry Association (TIA) Automotive Tire Service instructor. His focus is on sales support and field training for both Tire Repair and TPMS.
