

Cedar Rapids Chapter

EVAP Testing

In-person training with
Andrew Sexton, David Hall, and Colten Ramsey

Tuesday, June 9, 2026

6:00pm - 9:00pm

Kirkwood Community College
Automotive Technology Center
101 50th Ave SW
Cedar Rapids, IA 52404

This hands-on EVAP Diagnostics course is designed to help technicians build confidence in identifying, testing, and repairing evaporative emissions system faults. Participants will review EVAP system operation, common component failures, leak detection strategies, and diagnostic trouble code interpretation while learning practical approaches that improve diagnostic accuracy and efficiency. Through guided live demonstrations and interactive shop exercises, attendees will use scan tools, smoke machines, service information, and testing procedures to diagnose real-world EVAP concerns. This session is intended to provide technicians with practical diagnostic strategies they can immediately apply in the shop to reduce comebacks and improve repair confidence.

Members: \$35
Non-Members: \$45

Includes dinner
and training

For technicians,
managers, and
owners

MWACA is committed
