

# Roundtable Discussion: Solving Today's Shop Challenges Together

Running an automotive shop comes with daily challenges—and you're not alone.

Join fellow shop owners for an engaging roundtable discussion focused on real-world issues and collaborative problem-solving. Each participant is encouraged to bring one specific challenge they're currently facing—whether it's staffing, workflow, technology, or customer relations. We'll also explore broader high-value topics as time allows, including improving shop workflows, addressing training needs, and building more profitable operations.

Even if you don't have a specific challenge to share, your input is valuable. A key goal of this session is to identify common training needs among members to help guide future chapter support and development opportunities.

Come ready to contribute, connect, and grow alongside your peers.
