Happy Easter Families,

I hope everyone had fun and enjoyed their Spring Break! I can't wait to hear what everyone did on their break tomorrow! The end of the school is quickly approaching and we have so much learning left!! Below you will find the things we will work on this week!

**Reading-** This week we will focus on Text Dependent Analysis. Students will read a sample passage from a previous SC Ready test. After reading the passage the students will then respond to a question about the passage. Students are expected to go through the writing process (brainstorm, rough draft, edit/revise and final draft). Students will also need to use the RACE strategy that we have been working on in class the past several weeks.

**Math-**Before Spring Break we were working on Geometry, we will continue to review our Geometry unit during the first part of class. We will then work on Fractions the second part of class. We will also have a fact fluency check on Friday on the 3's fact family.

**Writing-** Our new writing is personal narratives. Students will brainstorm and narrow down their topic and begin writing their introduction this week.

**Research-** Many students are ahead of schedule with their checklist! We have due dates coming up this week so please check with your student and make sure they are up to date with their checklist. Student may start bringing in materials for their ecosystem when they are ready. Students will also need to bring in materials (chart paper, poster board, whatever they'd like to use to create it) to create their final draft of their food chain.

\*I've attached a copy of the checklist for your reference \*

Please feel free to email me if you have any questions or concerns.

Enjoy the rest of your Easter and Spring Break!

Warm Regards,  
Mrs. DeLangie
