

Navigating the UUCSC Website on a Smart Phone

Viewing the UUCSC website on your smart phone looks different than when you access it on a laptop or desktop computer. Some complain that it is hard to find anything besides the items on the front page.

1. Use a gentle touch to scroll down to view all items on the front page.
2. In the top right or left corner, depending on your device, notice the small **three-line icon**. Gently tap this icon to bring into view the menu that you see going across the page on a computer. (See Fig. 1.) Tapping on these words will take you to the item. (See Fig. 2)
3. But where are the links to **Directions, Contact Us, Calendar, and Members Directory**, that are found in the top menu on a computer? Scroll down to the bottom. (See Fig. 3)
