CHAIR PLACEMENT IN SANCTUARY

When we move the chairs in the sanctuary for an event, putting the chairs/rows back is a process! We need to have room in the aisles for safe egress, space between the rows for easy access, and a "missing row" on the left side (look towards the altar) for handicap accessibility!

When looking towards the altar, this is how it should appear:

Left side: 9 rows (no row should block the door to the Oneta Room), 6 chairs per row.

Right side: 10 rows, 5 chairs per row.

End row: chair legs should be touching the edge of the center aisle carpet (see photo).

All chairs should be hooked together in line, starting from the aisle chair (see photo).
