"*Finding the Mother Tree* reminds us that the world is a web of stories, connecting us to one another. Her vivid manuscript carries the stories of trees, fungi, soil and bears--and of a human being listening in on the conversation. The interplay of personal narrative, scientific insights and the amazing revelations about the life of the forest make a compelling story. Dr. Simard's journey as a scientist embodies the power of curiosity coupled to commitment to listen to the natural world and the courage to share what she has learned, against the resistance of scientific establishment. I have great admiration for her science and her storytelling alike. These are stories that the world needs to hear."—Robin Wall Kimmerer, author of *Braiding Sweetgrass*
