Case study

# Expert Electrical Interior planning & furniture

Rochdale, Greater Manchester

**Industry/Sector:** Wholesale & ecommerce

**Requirements:** Complete furniture solution for newly renovated premises

**Timescale:** Two months

## The client

Expert Electrical are an independent online electrical wholesaler supplying premium industrial electrical products to trade and consumers in the UK. Established in 2004 and based in Rochdale, they specialise in motor control gear, switch gear, cabling and low energy lighting. They pride themselves on being a 'one stop shop' for all of their customers' electrical needs, including sourcing obsolete and 'oddball' items.

## The project

After making the decision to relocate to larger premises and to renovate the new space, Expert Electrical sought a completely new and total furniture solution. Whilst the renovation plans were still being drawn up, ZenOffice were able to design the interior, plan the office layout and furniture placement across two floors of office space featuring meeting rooms, private offices and a canteen.

Already a customer of ZenOffice by way of purchasing from our Business Supplies division, the client initially turned to our Business Interiors catalogue to look at options for their new style. Zen's furniture specialists accompanied members of the Expert Electrical team to our furniture showroom to help them to visualise their future style, and provided 3D drawings to further instil confidence in their choices.

Zen were able to store the new furniture for a period whilst Expert Electrical's renovation was still being completed and then timed the installation to line-up with the builder's schedule, ensuring everything was ready as soon as possible.

## Scope of the work

Interior planning and installation of furniture, including;

- A 12-workstation, open plan office
- Screen mounts
- Desktop accessories
- Cable management
- Private offices featuring executive desks and ergonomic seating
- High and low canteen tables and seating
- Boardroom table and chairs for eight
- Reception area seating
- Furniture showroom visit
- 3D planning
- Pre-installation storage
- Installation across two floors

## The result

**"The visit to the furniture showroom was really helpful as we were finding it difficult choosing from the catalogues.**

**Once we had chosen the furniture, Zen designed the office layout whilst we were still at the drawing stage of the renovation! They then provided a 3D drawing of how it will look when finished which gave us confidence in our purchase.**

**I was kept regularly updated on the status of the furniture and they timed the installation to perfection to line up with our builders finishing. Our Account Managers visited the site once everything was in to make sure we were happy with the final result- I couldn't have asked for better guidance and service!"**
