

No Strings Attached!

SignSpring for the Banner, Sign and Fabric Graphics Industry

SignSpring
PATENTED
FABRIC GRAPHIC INSTALLATION SYSTEM
BannerSpring • BannerFrame • PosterSpring

SignSpring is...

- A breakthrough system for installation of fabric graphics for billboards, banners, wallscapes, p-o-p and on-premise signage.
- Developed for Lind Media Company, operator of 1,500 + billboards, posters, bulletins and wallscapes in Ohio.
- Excited to share ***BannerSpring, BannerFrame & PosterSpring*** with the entire Outdoor & Sign industries.

LIND
SignSpringGroup®

Lind SignSpring Group, LLC

409-411 North Main Street Mansfield, Ohio 44902

419-522-2600 419-522-1323(f) LindSignSpring.com

THE STORY

After experimenting with all banner, vinyl and PE poster installation systems, Lind Media knew it could develop a better product.

We wanted to avoid using ratchets, gripper bars, cables, pulleys, plastic clips, and tracks and quickly discovered that engineered spring and hook technology was far superior to all other methods.

After 8 years of development and proven usage worldwide, SignSpring is the most durable and cost-effective fabric graphic installation system on earth. Unequaled from the largest urban wallsapes & billboards to banners, windows, P-O-Ps and cabinet displays.

LIND
SignSpring[®]
PATENTED
BannerSpring • BannerFrame • PosterSpring

Perfection is Only Half the Story!

SignSpring provides **SIGNIFICANT** savings in man-hours and installation costs while providing **SIGNIFICANT** competitive advantage in aesthetics, durability and longevity.

SignSpring allows direct-from-box, on-site installation often with a single installer with quick initial installations and easy vinyl changeouts in minutes.

SignSpring means No hardware, rods, grommets, tracks, cables or accessories. Limited protrusions and tension means vinyl lasts much longer & easily suited for rotation and re-use.

SignSpring...for Outdoor!

SignSpring for Outdoor is the ultimate breakthrough in Billboard installation systems. Vinyls & PE posters go directly from shipping box to billboard, no tools or prep required. SignSpring provides SIGNIFICANT savings in man-hours and vehicle costs while providing the tightest, most flawless and durable installation system on earth!

- **Initial Conversions under an hour, re-posts in minutes.**
- **No hardware, rods or accessories means lighter loads and allow the use of smaller fuel efficient vehicles.**
- **Doubles and Triples postings per Man-Hour.**
- **Frees installers from tools, ratchets, rods and the dreaded 3-point climb.**
- **Eliminates water, wasp and rodent nest accumulation in vinyl pockets.**
- **Eliminates bent back bulletin corners and resulting illumination shadowing.**
- **Keeps installers on billboards fronts and away from nasty fiberglass shards**
- **Limited protrusions extends vinyl and PE life, allow easy rotation and re-use.**

BannerSpring on 54'x90' Wallscape(7oz vinyl)

SignSpring Installation Methods

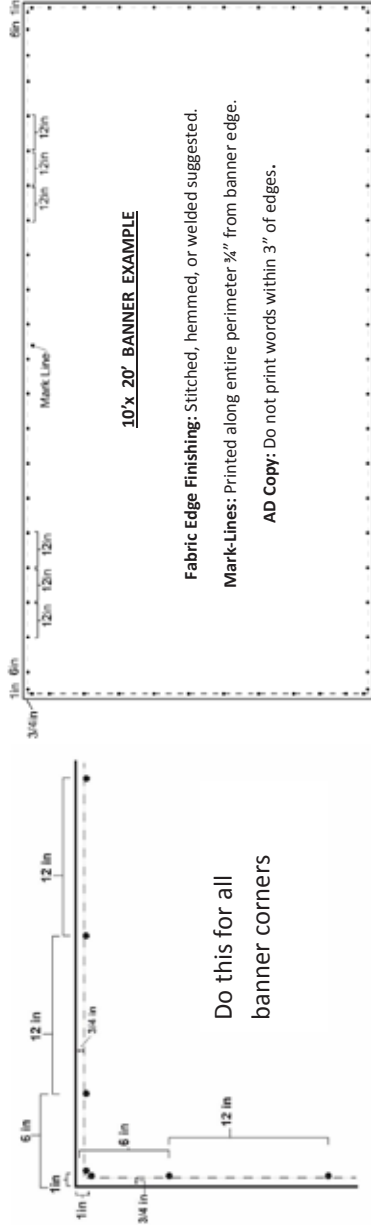

BannerFrame Fabric Graphic Print & Finishing Instructions (6-11-19)

Step 1: Mark the Mark-line

Print a thin line around the entire banner perimeter, $\frac{3}{4}$ " inside the banner edge.

Step 2: Mark and Punch Holes

On the corner, mark and punch $1/8$ " holes as shown below. Always punch the holes on the mark-line. Holes are always $3/4$ " away from Banner edge. The first hole is 1in from the edge. The second hole is 7in from the edge. Repeat this for each side of all four corners. All other holes will be 12in from each other.

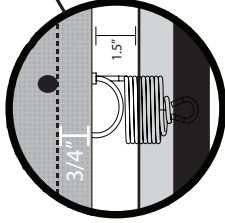

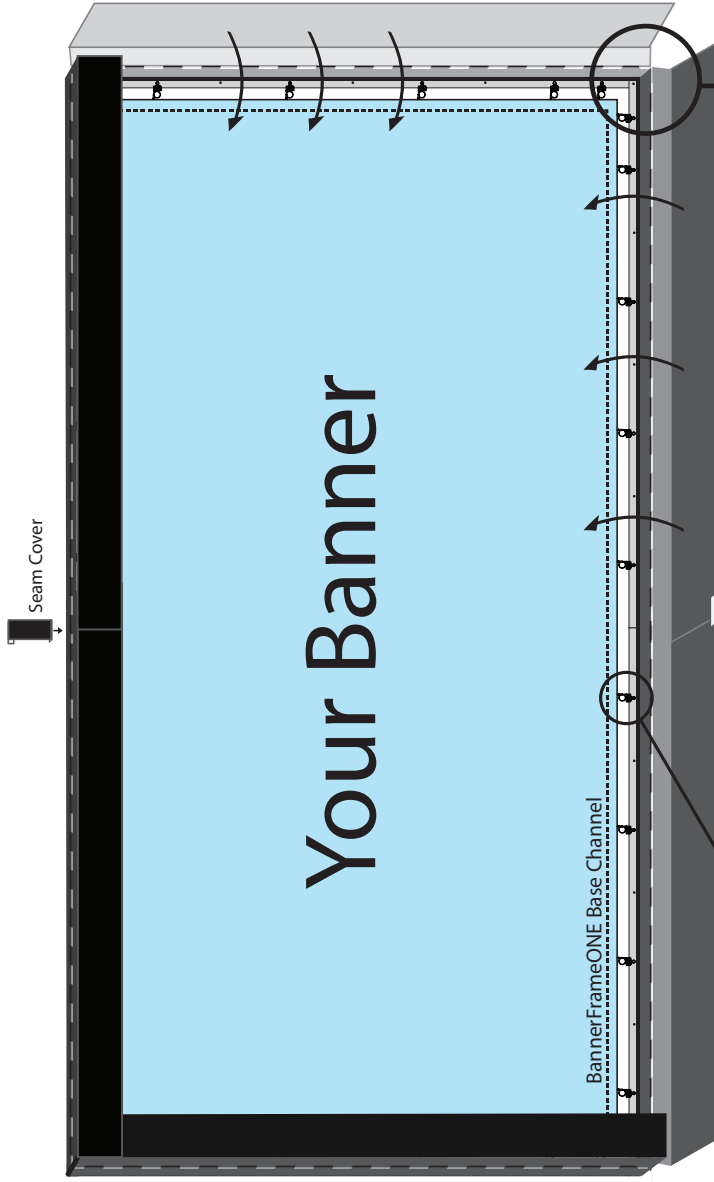

Substrate: Lind SignSpring Group suggests 7 oz. for vinyl for most applications. However, SignSpring also performs well on heavier vinyl along with mesh, backlit, PE and most fabric graphic substrates. If the vinyl is 7oz, use the springs to pierce the surface of the vinyl. However, if the vinyl is heavier stock, use a leather hole punch to pierce the surface of the vinyl.

Finishing: For best results, edges should be stitched, hemmed, or welded to avoid edge-curl. Do not use grommets.

Printing: Artwork and Final printing should include a mark-line bordering the entire graphic ($\frac{1}{4}$ " inside the banner edge). (If desired, the holes may also be marked or inserted as part of the printing process.) If using BannerFrame with cover section, remember that approximately 3" of vinyl perimeter will be covered by the BannerFrame Cover. As such, do not print AD copy within 3" of the banner edge.

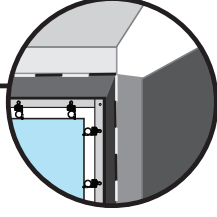

Lind SignSpring Group provides graphic fulfillment that includes pre-markings to assure efficient installation and flawless results.
